DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, and 23-24 drawn to detergent packaged in a pouch, classified in class 510, subclass 439.
 - II. Claims 10, 25, and 27, drawn to dishwashing powder composition, classified in class 510, subclass 224.
 - III. Claims 11 and 12, drawn to composition containing bleach, classified in class 510, subclass 367.
 - IV. Claims 13, 15 and 16, drawn to liquid dishwashing composition, classified in class 510, subclass 221.
 - V. Claims 14 and 26, drawn to dishwashing composition containing enzymes, classified in class 510, subclass 226.
 - VI. Claim 17, drawn to cleaning composition in the form of a wax, classified in class 510, subclass 224.
 - VII. Claims 18-22, drawn to solvent composition, classified in class 510, subclass 407.
 - VIII. Claim 28, drawn to method of cleaning tableware, classified in class 134, subclass 2.
 - IX. Claims 29-57, drawn to method of manufacturing a multi-compartment container, classified in class 493, subclass 84.

Art Unit: 1751

X. Claim 58, drawn to method of dishwashing, classified in class 134, subclass 2.

Noting that this group is separate from group VIII as the claim is incorrectly stating dependency upon a non-existent process of claim 25.

XI. Claim 59-63, drawn to 428, classified in class 428, subclass 35.7.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions IX and I, II, III, IV, V, VI, VII are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)).

In the instant case the product can be made in a variety of fashions including packaging the product in a standard cardboard box container.

3. Inventions IX and VIII, X are related as process of making and process of using the product. The use as claimed cannot be practiced with a materially different product. Since the product is not allowable, restriction is proper between said method of making and method of using. The product claim will be examined along with the elected invention (MPEP § 806.05(i)).

4. Inventions I, II, III, IV, V, VI, VII and VIII, X are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, dishes can be washed with a variety of compositions including water alone.

Art Unit: 1751

5. Inventions I, II, III, IV, V, VI, VII are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions require different ingredients that have well-established subclasses.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

7. Because these inventions are distinct for the reasons given above and the search required for Groups I, II, III, IV, V, VI, VII is not required for the remainder of Groups I, II, III, IV, V, VI, VII, restriction for examination purposes as indicated is proper.

8. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

9. As the restriction contains multiple groups, the following action will be mailed.

10. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

11. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1751

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
